

Incorporating Education for Sustainability into the European Curriculum -

For:

Primary and secondary teachers and sustainability educators

Purpose:

Sustainability as a core theme across the curriculum.

This workshop aims to give participants the skills and confidence to integrate sustainability themes into all subject disciplines.

Esest builds partnership for the maintenance of accreditation at proficient teacher level.

Sessions:

Why, what and how sustainability across the Europe?

Case studies of sustainability in action:

- blue economy models
- practical fieldwork skills
- lesson/unit planning for sustainability
- overcoming challenges and getting others on board.

Workshop format:

Workshops are for a full day. However, a customised, in-school consultancy service is also offered whereby workshops can be run over a full day, half day or as after-school sessions.

A combination of online and face-to-face presentation can also be catered for.
